

Ideation Phase – Define the Problem Statements

Date: _____ Team ID: _____

Project Name: Implement Client Script & UI Policy (Incident)

Maximum Marks: 2 Marks

Customer Problem Statement

Create a problem statement from the customer's point of view using the “I am / I’m trying to / But / Because / Which makes me feel” structure.

Problem Statement (PS)	I am	I'm trying to	But	Because	Which makes me feel
	an Incident user who needs to complete an Incident accurately	enter and update Incident information while the form dynamically guides field behaviour	the required, visible, and read-only states may not always be clear or consistent	Client Script and UI Policy conditions must respond correctly to changing Incident values	concerned that I may enter incomplete or incorrect information and have difficulty completing the Incident
	an application administrator responsible for Incident form configuration	implement Client Scripts and UI Policies that control field behaviour based on defined conditions	conflicting or incomplete configuration can produce unexpected form behaviour	the rules must be tested across different Incident states, categories, priorities, and field values	uncertain whether the intended form behaviour will be applied reliably and remain maintainable

The wording above adapts the uploaded project-specific problem-statement format to the requested Incident Client Script & UI Policy project.
