

Project Development Phase

Model Performance Test – Power BI

Project Name: Implement Client Script & UI Policy (Incident)

Date		Team ID	
Project Name	Implement Client Script & UI Policy (Incident)	Maximum Marks	

Model Performance Testing: Project team shall fill the following information in model performance testing template. Date and Team ID intentionally left blank.

S.No.	Parameter	Screenshot / Values
1	Data Rendered	Incident records and required fields are successfully displayed in the ServiceNow Incident form. The configured fields, labels, and values render correctly. Evidence: Incident-form screenshots / test results.
2	Data Preprocessing	Incident field values are validated and prepared for Client Script and UI Policy evaluation. Required/optional values, empty values, and invalid or unexpected values are handled according to the configured rules.
3	Utilization of Data Filters	ServiceNow Incident conditions act as the relevant filtering/context mechanism. UI Policy and Client Script conditions determine which field behavior applies to the current Incident record.
4	DAX Queries Used	Not applicable. No DAX calculation is required for the core Client Script & UI Policy (Incident) solution. N/A
5	Dashboard Design	Not applicable to the core solution. If a monitoring/reporting dashboard is created separately, record the number of visualizations/graphs after completion. N/A for the Incident form itself.
6	Report Design	Not applicable to the core solution. If a separate report is created to monitor Incident validation or form-rule outcomes, record the number of visualizations/graphs after completion.
